

OEKO-TEX APPENDIX 6 CLASS 1

STANDARD 100 by OEKO-TEX®

STANDARD 100 by OEKO-TEX® is one of the world's best-known labels for textiles tested for harmful substances. It stands for customer confidence and high product safety. Find out here what STANDARD 100 means and why it is worth checking for this label when buying textiles.

What does the label mean?

If a textile article carries the STANDARD 100 label, you can be certain that every component of this article, i.e. every thread, button and other accessories, has been tested for harmful substances and that the article therefore is harmless in human ecological terms. The test is conducted by our independent OEKO-TEX® partner institutes on the basis of our extensive OEKO-TEX® criteria catalog. In the test they take into account numerous regulated and non-regulated substances, which may be harmful to human health. In many cases the limit values for the STANDARD 100 go beyond national and international requirements. The criteria catalog is updated at least once a year and expanded with new scientific knowledge or statutory requirements. It is not easy for manufacturers and customers to keep an overview of the legal situation concerning harmful substances every day. Our experts from the OEKO-TEX® institutes do this for you.

What articles can be certified?

In principle, all textile articles in every stage of processing are suitable for a STANDARD 100 certification, starting from the threads to the finished fabrics and finished articles. According to a modular system we test every single component and ingredient before the final article is allowed to carry the STANDARD 100 label. This includes threads, buttons, zippers and linings. The prints and coatings applied to the outer material are also tested for harmful substances according to the criteria applicable to them. Whether baby textiles, clothing, home textiles or decorative materials: Products carrying the STANDARD 100 label signal trust.
